Pulse Secure – Ubuntu 14.04 to 16.04

Instructions

Download the installer package from https://as.exeter.ac.uk/it/network/vpn/

dpkg -i <package name>
e.g.
dpkg -i ps-pulse-linux-5.2r6.0-b977-ubuntu-debian-installer.deb

Install dependencies by running the following script
/usr/local/pulse/PulseClient.sh install_dependency_packages

You can now search for "Pulse Secure" from within your desktop environment or refer to the readme file in /usr/local/pulse for cli commands.
